Rubric

Slides includes Presents wireframes/mockups which address the design brief and components required

Slides Outlines how planned pages, components and styling will engage audience

Slides Presents an overview or sitemap which conforms with the design brief

Utilises HTML and CSS to create components which communicates text content with clarity

Utilises HTML and CSS to create components which convey meaning with clarity using graphical content

Utilises HTML and CSS to combine components to create a website with a purpose which aligns with the brief

Utilises Flexbox and/or CSS Grid to create a range of functional web page elements

Utilise subresource integrity to enable browsers to correctly recreate functional web page elements without unexpected manipulation

Utilise source control to provide different versions of an application for consideration by client

+ Add another card

Planning

Research layouts, tools such as CSS-Grid

Wireframing/ mockups

find cool graphics for site, unsplash and pintrest useful here.

create github repo for site.

create file structure and documents for site including README.md

push to github reguarly

add HTML documents, must accout for the semantic and accessabilty factors.

add css (mobile view first priority)

use css-grid and or flex-box to auto adjust for other screen sizes to give optimal results on those devices.

test website in different browsers and devices/simulator

check all criteria for Rubric has been meet.

upload final source and docs to github.

create zip file of site

submit ziooed file to Canvas for marking.

About Me

Hi, I'm Peter!
I live in sunny Brisbane, Australia. With My incredible wife, and daughter and *Momo* our "mere-cat". not to be confused with the african "meercat" Although she's having a bit of an identity crisis, pictures for proof on the right.

My Skills and Experience

I'm currently a fultime student at Coder Academy Web Developer Bootcamp (diploma course).

Forward focus, What I'm Learning now is the "M.E.R.N" stack. Itemised below are the other skills I have aquired
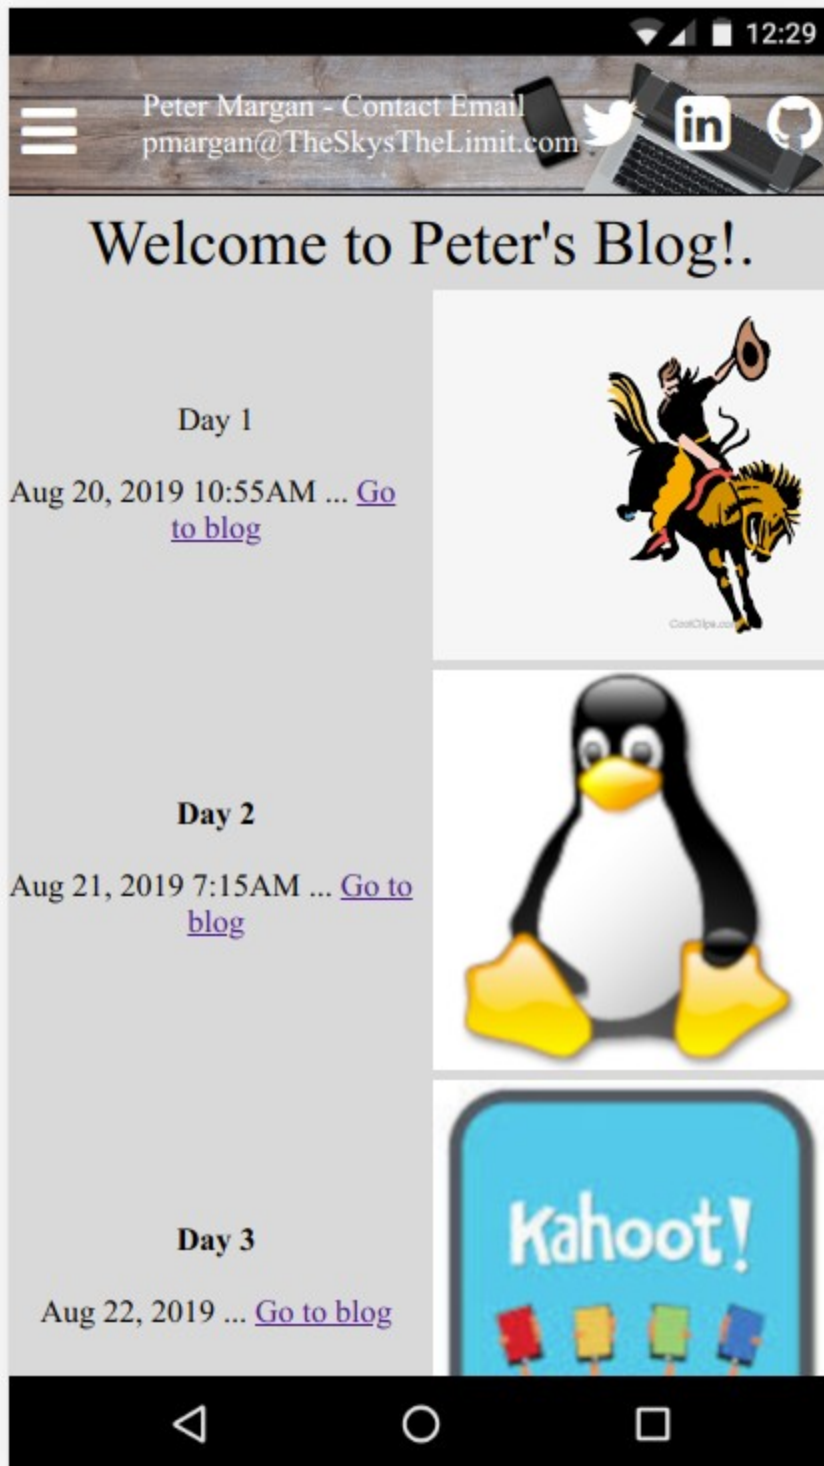

.

HTML, CSS, JAVASCRIPT
These three languages I have extensive experience with as the fundamentals forming the core of the WWW.

Ruby and Rails
Ruby I have some experience with and have created a terminal app. here on my github. Rails I am just starting to train with now.

LAMP STACK
I have (self taught), past experience using "LAMP stack". Where I built and hosted my own servers. One was a

I live in sunny Brisbane, Australia. With My incredible wife, and daughter and *Momo* our "mere-cat". not to be confused with the african "meercat" Although she's having a bit of an identity crisis, pictures for proof on the right.

"A Meercat"

"My Mere-cat"

Intrests & Hobbies.
I'm fully into Linux operating systems, "I AM #ROOT", my picture's nextdoor. I have used many flavours of linux over the last 15 years. I use linux as my daily driver and development environment.

"Linux is cool "

Code
Monday to Friday however I am writing code or learning more about coding. There is nothing quite like writing code, running it and seeing your creation come to life!. With the possible exceptions of My wedding day and the births of our children. Coding right up there in bronze medal

One great thing about

I love all things tech, gadgets
